*Allowable Subject Matter*

Claims 1-9 and 11 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or render obvious the instantly claimed process of extruding a mixture of thermoplastic particles, as a whole, comprising the temperature control of an intake/feed zone to a range below the melting point of both thermoplastics and a delivery/metering zone to a temperature that is between the melting point of both thermoplastics.

For claim clarity, the examiner notes that the commonly used terms for the instant "intake, heating, and delivery zones" are -- feed, compression or melting, and metering zones --, respectively. Boguslawski (US Pat. 4,462,691, see 4:1-3) is cited as evidence that the "delivery zone" is equivalent to the usual term, -- metering zone --.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
